*Prices excluding VAT

THE PROCESS

From hand to hand.

01

RECLAIM

Surplus tarpaulin is collected from European haulage. Each sheet arrives with its own scars — sun-bleached panels, stitched repairs, the ghost of a logo.

02

CUT

Patterns are laid by hand to honour the marks already there.

03

SEW

Seat-belt webbing for straps. Industrial thread. Built to keep going.

LORRY·L-02

Sports Bag

The perfect bag whether it's for sports kit or international travel. Made from recycled truck tarpaulins with handles made from discarded car seatbelt material. It has a small open inside pocket and a handy small open outside pocket.

RRP	€42

THE MATERIAL

Upcycled Truck Tarpaulin.

In Europe, truck tarpaulins spend years on the road, protecting cargo through thousands of miles. When they become torn, scuffed, or worn down, they are typically discarded. We reclaim them — every cut carries a fingerprint of the road.

THE MATERIAL

Apple-Pomace Vegan Textile.

Roughly thirty thousand tonnes of apple pomace — the pulp left after juicing — go to waste each year. We work with a textile mill that gives the pomace a second life as a soft, durable, animal-free material designed to be greener, cleaner and more responsible.
